

September 29, 2021

The Honorable Nancy Pelosi
Speaker of the House
U.S. House of Representatives
1236 Longworth House Office Building
Washington, DC 20515

The Honorable Kevin McCarthy
Republican Leader
U.S. House of Representatives
2468 Rayburn House Office Building
Washington, DC 20515

Dear Speaker Pelosi and Leader McCarthy:

We, the undersigned organizations and companies who support the Credit for Caring Act (H.R. 3321), applaud the inclusion of a family caregiver tax credit consistent with this bill in the legislation approved by the House Ways & Means Committee on September 15. We urge you to include this family caregiver tax credit in the final version of the budget reconciliation package. The committee took this important action to support family caregivers and we ask you to do the same.

Family caregivers are the backbone of services and supports in this country. They help make it possible for older adults, people with disabilities, and veterans to live independently in their homes and communities. Most of us are, have been, or will be a family caregiver or will need help to live independently. This is an ageless and nonpartisan issue. Family caregivers are all ages, races, and ethnicities and cut across all segments of our population. The physical, emotional, and financial challenges they face in their caregiving roles cannot be overstated and, for many, the challenges have increased with COVID-19.

There is also a significant economic impact as family caregivers provide about \$470 billion annually in unpaid care to their loved ones. In addition, they face out-of-pocket expenses to assist their loved ones as well as potential income and retirement savings foregone. An AARP report found that family caregivers spend, on average, 26 percent of their income on caregiving expenses or \$7,242 annually. Hispanic/Latino and African American caregivers reported greater financial strain. Assistance from family caregivers helps save taxpayer dollars by helping to delay or prevent more costly nursing home care and unnecessary hospital stays.

The modified version of the Credit for Caring Act passed by the Ways & Means Committee would create a new, non-refundable federal tax credit of up to \$2,000 for eligible family caregivers to help address the financial challenges of caregiving. Eligible family caregivers caring for loved ones of all ages could receive the credit if the care recipient meets certain functional or cognitive limitations or other requirements. This tax credit would help family caregivers who care for non-dependents or who do not live with the person they are assisting.

We look forward to working with you to make this tax credit a reality for family caregivers nationwide. If you have any questions, please contact Rhonda Richards at r-richards@aarps.org.

Sincerely,

September 29, 2021

The Honorable Richard Neal
Chairman
House Committee on Ways and Means
1102 Longworth House Office Building
Washington, D.C. 20515

Dear Chairman Neal:

We, the undersigned organizations and companies who support the Credit for Caring Act (H.R. 3321), sincerely commend and thank you for including a family caregiver tax credit consistent with this bill in the legislation approved by the House Ways & Means Committee on September 15. We appreciate your leadership, and we urge inclusion of the family caregiver tax credit in the final version of the budget reconciliation package. The inclusion of the family caregiver tax credit in the committee's legislation is a crucial step toward it becoming law.

Family caregivers are the backbone of services and supports in this country. They help make it possible for older adults, people with disabilities, and veterans to live independently in their homes and communities. Most of us are, have been, or will be a family caregiver or will need help to live independently. This is an ageless and nonpartisan issue. Family caregivers are all ages, races, and ethnicities and cut across all segments of our population. The physical, emotional, and financial challenges they face in their caregiving roles cannot be overstated and, for many, the challenges have increased with COVID-19.

There is also a significant economic impact as family caregivers provide about \$470 billion annually in unpaid care to their loved ones. In addition, they face out-of-pocket expenses to assist their loved ones as well as potential income and retirement savings foregone. An AARP report found that family caregivers spend, on average, 26 percent of their income on caregiving expenses or \$7,242 annually. Hispanic/Latino and African American caregivers reported greater financial strain. Assistance from family caregivers helps save taxpayer dollars by helping to delay or prevent more costly nursing home care and unnecessary hospital stays.

Your leadership better enables the inclusion of this important family caregiver tax credit in the reconciliation package when it is considered by the full House. It is one critical step that Congress can take to help provide some relief to family caregivers across the country struggling with the financial challenge of caregiving. We look forward to working with you to make this tax credit a reality for family caregivers in Massachusetts and nationwide. If you have any questions, please contact Rhonda Richards at r-richards@arp.org.

The Honorable Linda Sánchez
U.S. House of Representatives
2329 Rayburn House Office Building
Washington, DC 20515

Dear Representative Sánchez:

We, the undersigned organizations and companies who support the Credit for Caring Act (H.R. 3321), sincerely commend and thank you for your successful efforts that led to the inclusion of a family caregiver tax credit consistent with this bill in the legislation approved by the House Ways & Means Committee on September 15. As the sponsor of this legislation in the House, we appreciate your leadership, and we urge inclusion of the family tax credit in the final version of the budget reconciliation package. The inclusion of the family caregiver tax credit in the committee's legislation is a crucial step toward it becoming law.

Family caregivers are the backbone of services and supports in this country. They help make it possible for older adults, people with disabilities, and veterans to live independently in their homes and communities. Most of us are, have been, or will be a family caregiver or will need help to live independently. This is an ageless and nonpartisan issue. Family caregivers are all ages, races, and ethnicities and cut across all segments of our population. The physical, emotional, and financial challenges they face in their caregiving roles cannot be overstated and, for many, the challenges have increased with COVID-19.

There is also a significant economic impact as family caregivers provide about \$470 billion annually in unpaid care to their loved ones.
