The Honorable Patty Murray  
Chair  
Subcommittee on Labor, Health and  
Human Services, and Education  
131 Dirksen Senate Office Building  
Washington, DC 20510

The Honorable Roy Blunt  
Ranking Member  
Subcommittee on Labor, Health and  
Human Services, and Education  
156 Dirksen Senate Office Building  
Washington, DC 20510

Dear Chair Murray and Ranking Member Blunt:

On behalf of the Consortium for Citizens with Disabilities Technology and Telecommunications Task Force, the undersigned organizations are writing to ask for your support for the inclusion of \$60 million in the Fiscal Year (FY) 2023 Senate Labor, Health and Human Services and Education Appropriations (LHHS) bill for the Assistive Technology (AT) Act Programs. Funding provided through the AT Act supports programs that ensure people with disabilities have access to and are able to acquire the assistive technology, devices, and services they need to live, work, and attend school in their communities.

The Consortium for Citizens with Disabilities is a coalition of more than 100 national disability organizations working together to advocate for national public policy that ensures the self-determination, independence, empowerment, integration and inclusion of children and adults with disabilities in all aspects of society. The Technology and Telecommunications Task Force focuses on national policy regarding matters of telecommunications and technology, including assistive technology, in order to help move society toward our ultimate goal of full inclusion for all people with a disability.

The AT Act programs provide critical funding to ensure people with disabilities can access and acquire the assistive technology devices and services they need to live, work, and attend school in their communities. During the COVID pandemic, these services are even more greatly needed and in high demand to address social isolation, remote learning and working, and much more. The AT Act programs are one of the few disability programs to not receive any additional funding in the COVID relief and stimulus bills enacted thus far to support the increased demand for their direct services, and the programs are in dire need of additional financial support. Funding the AT Act at \$60 million would allow **all** programs to provide the full breadth of services required by the law, and also address the needs arising from the COVID pandemic and the current return to in-person interaction.

When the AT Act was reauthorized by the Congress in 2004, Statewide AT Programs became responsible for providing more services that bring assistive technology directly into the hands of those who need it. AT Act Programs are required to operate statewide programs that are available for persons with all types of disabilities, of all ages, in all environments (education, employment, community living, and information technology). State programs are required to provide a continuum of services that increase awareness of and access to assistive technology, including state financing activities (such as financial loans, cooperative buys, funds of last resort, etc.), device reutilization (including recycling, repair, refurbishment and device exchange), device loan/borrowing, and device demonstration services. These state level activities are provided in addition to previously required activities, including information and assistance, training, technical assistance, and coordination and collaboration. While individuals with disabilities, their families, and guardians are the primary beneficiaries of services, the AT Act requires Statewide AT Act Programs to provide a wide range of services and supports to other stakeholders such as educators, employers, health care providers, rehabilitation providers, and technology experts including web designers, procurement officials and AT manufacturers and vendors. While the 2004 amendments to the AT Act have had a positive effect by improving the consistency and availability of a continuum of services nationally, it is unfortunate that the increased requirement to implement seven, rather than four, activities *has not been met with the full amount of resources needed to achieve the intent of the law.*

The nationwide network of Protection and Advocacy for Assistive Technology (PAAT) programs in every state, Puerto Rico, the District of Columbia, four territories, and a fifty-seventh agency serving the Hopi, Navaho, and San Juan Southern Paiute tribes in the Four Corners region has been similarly under-funded. Twenty-four programs receive a minimum allotment of just \$50,000 and all the territories receive \$30,000. Larger states such as Pennsylvania (\$152,347), Georgia (\$126,350), Florida (\$255,590), and Ohio (\$139,103) receive insufficient funding when compared to their populations. The PAAT programs use these very limited funds to provide needed advocacy services to children and adults with disabilities. Every PAAT program conducts trainings and works with families, medical providers, schools, employers, and communities to ensure that individuals have access to the assistive technology they need.

Thank you again for your efforts on behalf of the AT Act, which is so important to Americans with disabilities and to serving the growing needs during this public health crisis. We look forward to working with you in the coming months as Congress works to finalize the FY 2023 appropriations process. If you have any questions, please feel free to contact one of the CCD Technology and Telecommunications Task Force Co-Chairs: Audrey Busch-Treussard, [audrey.busch-treussard@ataporg.org](mailto:audrey.busch-treussard@ataporg.org); Joseph Nahra, [joseph.nahra@powerslaw.com](mailto:joseph.nahra@powerslaw.com); Clark Rachfal, [crachfal@acb.org](mailto:crachfal@acb.org); or Laura Kaloi, [lkaloi@stridepolicy.com](mailto:lkaloi@stridepolicy.com).

Sincerely,
