Re: Protect Medicaid Beneficiary Access to Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (“DMEPOS”)

Dear House and Senate Leaders:

On behalf of the undersigned members of the Independence Through Enhancement of Medicare and Medicaid (ITEM) Coalition, we write with urgency to underscore the critical need to protect Medicaid beneficiaries’ access to durable medical equipment, prosthetics, orthotics, and supplies (“DMEPOS”) as Congress considers significant Medicaid budget cuts in the reconciliation package currently under negotiation. The ITEM Coalition typically does not address reimbursement issues and tends to focus on coverage and coding of assistive devices and technologies. However, when significant threats to reimbursement would materially impact patient access to care, we feel it is important to weigh-in with our members’ concerns.

The ITEM Coalition is a national consumer- and clinician-led coalition comprised of over 100 national organizations advocating for access to and coverage of assistive devices, technologies, and related services for people with injuries, illnesses, disabilities, and chronic conditions of all ages. Our members represent individuals with a wide range of disabling conditions, as well as the providers who serve them, including spinal cord injury, brain injury, stroke, limb loss, multiple sclerosis, paralysis, cerebral palsy, spina bifida, hearing, speech, and visual impairments, and other life-altering conditions.

Medicaid provides coverage for over 72 million Americans, including low-income families, children, older adults, and people with disabilities—populations that experience much higher rates of complex medical and functional needs compared to those who are not enrolled in Medicaid. For these individuals, access to DMEPOS is not a luxury—it is essential. These items are a lifeline to beneficiaries enabling safe, effective, and patient-centered care in the home

and community, helping to prevent costly institutional care, and promoting greater functional independence and quality of life.

The ITEM Coalition urges Congressional leadership to recognize that any reductions in Medicaid reimbursement or coverage for DMEPOS would result in serious—and entirely avoidable—consequences. Such cuts would not only undermine the health and dignity of Medicaid beneficiaries, but also contradict the program’s goals of promoting access to quality, cost-effective healthcare services. These harmful potential outcomes include:

- Disruption in access to medically necessary equipment and supplies
- Increased emergency department visits, hospitalizations, and institutional placements
- Higher long-term health care costs for states and the federal government
- Loss of independence, mobility, and quality of life for Medicaid beneficiaries

DMEPOS also plays a crucial role in delivering long-term services and supports (“LTSS”), which account for a significant portion of Medicaid spending. In fact, more than half of all Medicaid expenditures are directed toward LTSS, with 72% delivered in home and community-based settings (“HCBS”)—settings that are not only preferred by beneficiaries but are also more cost-effective than institutional alternatives, such as nursing homes.

For many Americans, Medicaid is the only avenue to access these critical assistive devices and technologies. Reducing access to DMEPOS would not only deepen already-existing disparities, but also reverse significant progress that has been made in expanding home- and community-based care over the past three decades while shifting costs to higher-acuity, higher-cost settings. Maintaining coverage and adequate reimbursement is essential to ensuring that Medicaid continues to fulfill its role as a safety net program that supports better health, economic stability, and independent living.

For these reasons, the ITEM Coalition strongly urges Congress to protect Medicaid coverage and reimbursement for DMEPOS. We welcome the opportunity to work with you on sustainable, patient-centered policies that ensure access to cost-effective care in the most appropriate setting.

Thank you for your continued leadership and commitment to the health and dignity of Medicaid beneficiaries. If you have any questions, please do not hesitate to contact ITEM Coalition co-coordinators Peter Thomas and Michael Barnett at Peter.Thomas@PowersLaw.com or Michael.Barnett@PowersLaw.com or call 202-466-6550.

Sincerely,

The Undersigned Members of the ITEM Coalition
